# Performance Testing

1. **Tool Used**:
   - o Use **Google PageSpeed Insights** to analyze performance.
2. **Key Focus Areas**:
   - o **Optimize Images**: Compress and use next-gen formats like WebP.
   - o **Minimize Code**: Reduce JavaScript and CSS size.
   - o **Caching**: Implement browser caching for faster load times.
3. **Actionable Insights**:
   - o Address suggestions provided by PageSpeed, like reducing render-blocking resources and improving time-to-interactive.
4. **Goal**:
   - o Achieve a **score of 90+** on desktop and mobile.
